# SCULPT COTSWOLDS

On-site facial and body treatments  
for wedding venues, private  
celebrations and retreats.

## ABOUT SCULPT

Sculpt is a Cotswolds-based facial and body treatment service founded by Georgie, offering calm, personalised treatments in beautiful settings.

With over 18 years' experience, Georgie has worked across luxury hotel spas, medical-grade skin clinics and as a Spa Manager aboard private superyachts. This background has shaped the way Sculpt operates today, with a strong focus on discretion, attention to detail and genuinely personalised care.

Whether offered during a wedding weekend, a Cotswolds stay or a retreat, the intention remains the same: to create a quiet, restorative experience that feels unhurried, grounding and thoughtfully delivered.

## BOOKINGS & AVAILABILITY

Treatments are arranged in advance and subject to availability. A minimum booking of two hours is required, which may include a single extended treatment or a combination of treatments during the booking period.

All treatments are delivered on-site using a fully self-contained setup. Travel charges may apply for venues located beyond a 10-mile radius of my base in the Cotswolds.

Phone consultations are available to discuss requirements and create tailored treatment options for guests.

## TREATMENT MENU

### FACIALS

#### SCULPTED MASSAGE FACIAL

60 minutes • £90

A deeply relaxing facial focused on lifting, sculpting and supporting healthy lymphatic flow. The treatment begins with a gentle cleanse and light enzyme exfoliation, followed by slow, precise massage to release tension and soften facial muscles.

Massage extends through the chest, shoulders and neck to ease deeper areas of stress. Gua sha and cool cryo sticks are used to calm the skin, reduce puffiness and enhance natural definition. A soothing scalp massage and tailored finishing products complete the treatment, leaving the skin refreshed, smooth and visibly lifted.

#### BUCCAL SCULPT FACIAL

75 minutes • £120

A deeply therapeutic facial combining external sculpting massage with buccal (intra-oral) techniques to release tension and support natural facial balance. Following a thorough cleanse and gentle exfoliation, lifting massage techniques prepare the facial muscles before buccal work focuses on easing jaw tension and areas of tightness commonly held through the face.

LED light therapy is used to support skin health and radiance, while gua sha and a calming scalp massage encourage relaxation and definition. Tailored finishing products complete the treatment, leaving the skin feeling relieved, lifted and refreshed.

## RADIANCE FACIAL

60 minutes • £115

A complexion-refining facial designed to brighten, smooth and restore clarity to the skin. Following a deep cleanse and gentle enzyme exfoliation, dermaplaning is offered as an optional step to further refine the complexion. For guests who prefer not to dermaplane, this time is instead used for facial massage to support circulation and natural radiance.

A Bioeffect EGF hydrogel mask replenishes and hydrates the skin, while LED light therapy supports luminosity and collagen activity. Cool cryo sticks help calm the skin and reduce puffiness, before tailored finishing products are applied, leaving the complexion hydrated, balanced and radiant.

## CO<sub>2</sub> LIFT FACIAL

90 minutes • £155

A results-driven facial centred around a CO<sub>2</sub> treatment to support oxygenation, hydration and visible firmness. Following a deep cleanse, lymphatic drainage massage and gentle enzyme exfoliation prepare the skin for the CO<sub>2</sub> phase - a carboxytherapy gel that supports collagen while nourishing the skin, encouraging repair and leaving the complexion smoother and lifted.

Microcurrent and LED light therapy are used to support lift and overall skin vitality. While the mask is active, a relaxing hand, arm and scalp massage allows the body to fully unwind. Cooling cryo sticks are applied to calm the skin and reduce puffiness, before tailored finishing products complete the treatment. This facial is particularly well suited to pre-event preparation.

### POWERLIFT FACIAL

60 minutes • £125

A results-focused facial combining sculpting massage with the PureLift Pro Plus microcurrent device to tone and energise the facial muscles. The treatment begins with a gentle cleanse and refining enzyme exfoliation, followed by slow, lifting massage to boost circulation and release tension. Microcurrent is then used to work deeper facial muscles, supporting firmness and improved tone. Tailored skincare completes the treatment, leaving the skin smooth, lifted and revitalised - a modern approach to facial lifting with a refined, luxurious finish.

### BESPOKE FACIAL

60 minutes • £100

A fully personalised facial guided by your skin's needs on the day. Techniques, tools and targeted masks are selected intuitively, allowing the treatment to adapt to what your skin requires. Well suited to those unsure which facial to book or looking for a tailored introduction to the Sculpt experience, this treatment offers a flexible, hands-on approach, leaving the skin calm, balanced and well supported.

### ADVANCED BESPOKE FACIAL

90 minutes • £155

This extended facial allows time for the use of Sculpt's most advanced techniques and technologies, selected intuitively to work in depth with your skin on the day. With additional time built in, the treatment supports a more thorough approach to skin health while maintaining the calm, restorative flow that defines the Sculpt experience.

No two sessions are the same. Designed for those seeking a higher level of refinement or a more in-depth facial experience, this treatment offers the most comprehensive approach within the Sculpt menu.

## BODY MASSAGE

All body treatments begin with a warming foot cleanse and essential oil inhalation to help the body and nervous system settle.

Each experience is fully personalised, with pressure and techniques - including deep tissue - adapted to your needs, from focused release to slower, restorative work.

## BACK, NECK & SCALP

45 minutes • £75

A focused treatment for areas where tension is most commonly held. The back, shoulders and neck are worked using adaptable pressure and techniques, before a soothing scalp ritual helps calm the nervous system and restore a sense of lightness.

## FULL BODY EXPERIENCE

60 minutes • £90

A personalised full-body massage tailored to your needs on the day. Pressure and techniques are adjusted throughout to support relaxation, improve circulation and ease areas of tension.

## HEAD-TO-TOE EXPERIENCE

90 minutes • £135

An extended head-to-toe treatment designed for full-body relaxation. This treatment combines a personalised body massage with a facial and calming scalp ritual, with pressure and techniques adapted throughout to suit your needs.

The experience leaves the body settled and relaxed, and the skin feeling cared for and refreshed.
